👤 About Me

Motivated software engineer with a strong foundation in JavaScript, Java, and Node.js, and hands-on experience in front-end and back-end development. Recognized as a fast learner, effective communicator, and proactive problem solver, I excel in collaborative environments. I am passionate about innovation and eager to apply my skills, adaptability, and creativity to drive the success of a dynamic software development team..

✦ Skills

- Programming Languages: Java, Python, JavaScript

- Web Development: HTML, CSS, Bootstrap, jQuery, Spring Framework

- Database Management: MySQL, Hibernate

- Tools/Technologies: Git, REST APIs, Express

- Other Skills: Agile methodology, debugging, problem-solving

🎓 Education

● Graduate Diploma in Software Engineering
Institute of Java & Software Engineering (IJSE)
2023 - 2025

● Completed A/L Examination
Southlands College – Galle
2019-2022

● Completed O/L Examination
G/Sri Kalyanathissa Viddiyalaya
2017 - 2018

💼 PROJECTS

● Hotel Website
Built a responsive hotel website using HTML, CSS, and JavaScript. Optimized for both desktop and mobile, delivering a seamless user experience with modern design and an intuitive booking system.

● Crop Monitoring System
A smart agriculture solution that helps track crop health, manage field data, and optimize farming decisions. Built with React, Redux, Tailwind CSS, and Spring Boot, it ensures efficient farm management with real-time monitoring.

● BudgetBuddy - Expense Tracker
Personal expense tracker application built using the MERN stack (MySQL with Prisma, Express, React, Node.js). This project helps users track their expenses efficiently, analyze spending patterns, and visualize trends through interactive charts.

● NovaNews - Mobile App
A React Native mobile application for tracking and reading the latest news. Built with Expo, it provides a smooth and responsive experience for staying updated on current events.
